

Appendix G

## ***Socioeconomic Data***

**This page intentionally left blank.**

## *Sources of Demographic Data Used in the Environmental Impact Statement (EIS)*

Several sources of demographic data were used for the analyses in this Final EIS. The following describes the data sources used, where they were used in the document, and why the data sources were selected.

### **U.S. Census Bureau Data**

The U.S. Census Bureau is the dominant source of demographic and socioeconomic data used in this Final EIS. Total population, race, and ethnicity data were sourced from the 2010 Census and income, ability to speak English and other socioeconomic data were sourced from the 2008-2012 American Community Survey (ACS) 5-year survey.

Between the 2000 and 2010 Census a redistricting effort occurred which resulted in the subdivision of some census geography along the US 281 project corridor. As such, the 2010 Census geography is numbered differently than the 2000 Census geography. The 2010 Census and the 2008-2012 ACS data rely on the 2010 Census geography. A 2000 to 2010 geography conversion chart is shown in **Table G-10**.

2000 and 2010 Census and 2008-2012 ACS data were used in:

**Chapter 1 – Need for and Purpose of the Proposed Action**

**Chapter 3 – Affected Environment and Environmental Consequences**

**Chapter 4 – Indirect Effects**

**Chapter 5 – Cumulative Effects**

1 **Table G-1: 2000 and 2010 Block Groups**

2000 Block Groups	2010 Block Groups	
Tract 1211.17, Block Group 1	Tract 1211.17, Block Group 1	Tract 1918.09, Block Group 1
Tract 1211.17, Block Group 2	Tract 1211.17, Block Group 2	Tract 1918.09, Block Group 2

### 3 **Demographic Projections**

4 To help ensure consistency with local and regional plans and policies, demographic projections developed by  
5 the Alamo Area Metropolitan Planning Organization, formerly the San Antonio-Bexar County Metropolitan  
6 Planning Organization (MPO) for *Mobility 2035* were used to describe the future demographic conditions along  
7 the US 281 Project Corridor through 2035. The MPO adopted *Mobility 2040* on December 8, 2014, which includes  
8 updated demographic projections; however they were not available at the time of this analysis. The 2035  
9 demographic projections were the most current data available at the time. These projections use a geography  
10 called Traffic Analysis Zones (TAZ) which share common boundaries with U.S. Census tracts and include  
11 statistics about population, employment and households for the MPO's metropolitan planning area (Bexar,  
12 Comal, Guadalupe, Kendall, and Wilson counties).

MPO Projections for *Mobility 2035* were used in:

**Chapter 1 – Need for and Purpose of the Proposed Action**

**Chapter 3 – Affected Environment and Environmental Consequences**

**The Texas State Data Center (TSDC) and Environmental Systems Research Institute (ESRI):**

The TSDC and ESRI provide population projections at the county level for the US 281 project corridor and were used for the demographic analysis found in **Chapter 4 – Indirect Effects**. In order to analyze indirect effects, an area of influence (AOI) was established which represents the geographic area where probable encroachment-alteration and induced land development effects of the proposed project are likely to occur. The AOI is approximately 560 square miles and includes portions of Bexar, Blanco, Comal and Kendall counties. The MPO projections were not used in this analysis because the MPO's metropolitan planning area does not include Blanco County. As such, population data developed by TSDC and ESRI and analyzed by SA Research Corporation were used to describe the projected population growth through 2035 for the four counties intersecting the AOI as well as for the AOI. As shown in **Figure 3-4 in Chapter 3 – Affected Environment and Environmental Consequences**, the projections developed by the TSDC are comparable to the projections developed by the MPO.

TSDC and ESRI Projections were used in:

**Chapter 4 – Indirect Effects**

**U.S. Department of Labor, Bureau of Labor Statistics (BLS):**

The BLS collects employment and unemployment statistics on an annual basis at the regional and county level. To demonstrate year-to-year employment/unemployment trends, BLS employment and unemployment data were used for the socioeconomic analysis in **Chapter 3 – Affected Environment and Environmental Consequences**.

BLS data were used in:

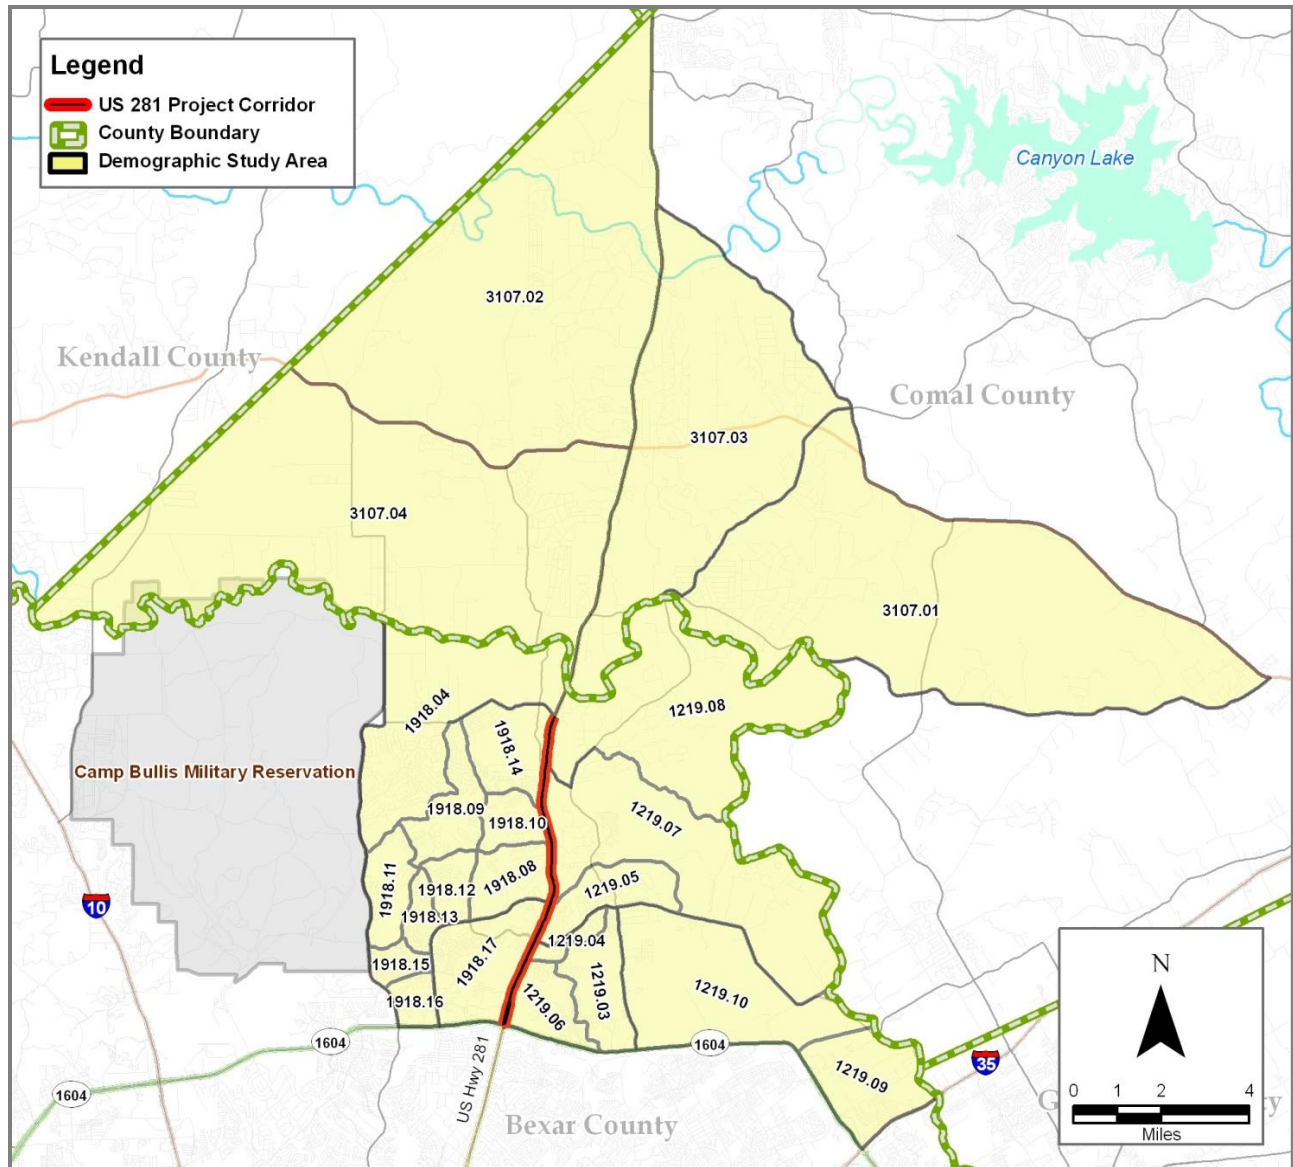

**Chapter 3 – Affected Environment and Environmental Consequences**

## Historical Growth

Chapter 1 – Need for and Purpose of the Proposed Action, and Chapter 3 – Affected Environment and Environmental Consequences use a Demographic Study Area to describe the historical growth that has occurred along the US 281 project corridor. 1980, 1990, 2000, and 2010 Census and the 2006-2010 American Community Survey data was sourced to describe the historical growth in the Demographic Study Area. Figure G-4 highlights the census tracts in the Demographic Study Area.

Figure G-4: US 281 – 2010 Census Tracts in the Demographic Study Area

Source: US Census Bureau & US 281 EIS Team, August 2010.

12 statistics are intended only to show a growth pattern in general and have not been used for analysis purposes in this Draft EIS.

13

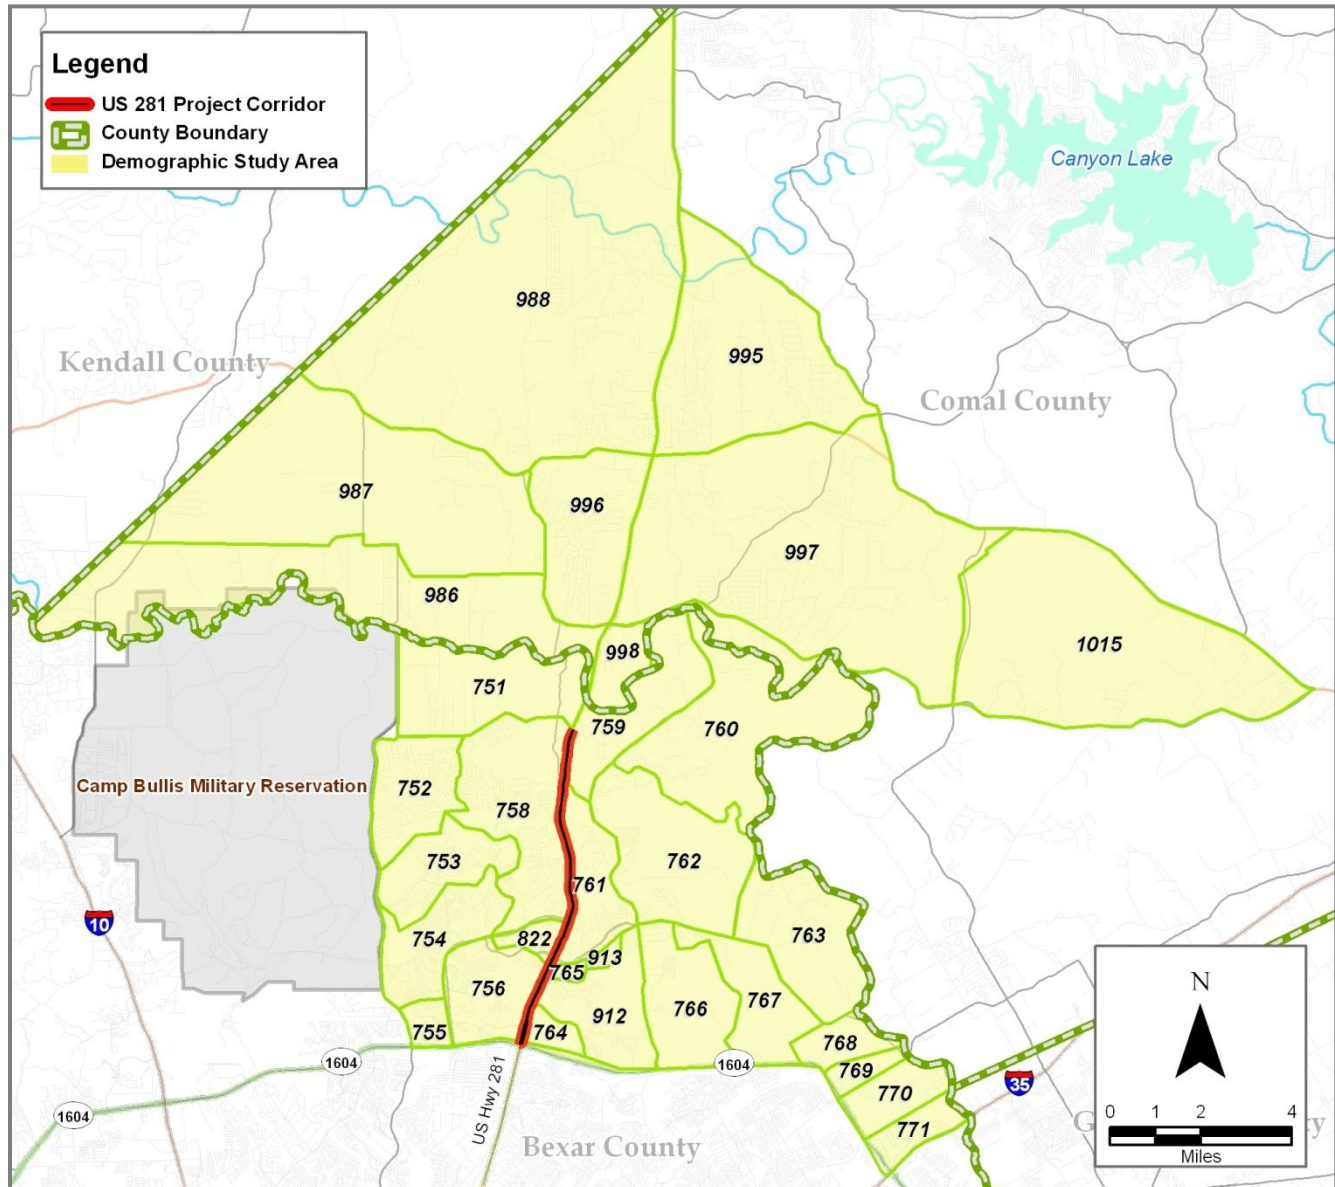

## Forecasted Growth

Chapter 1 – Need and Purpose of the Proposed Action, and Chapter 3 – Affected Environment and Environmental Consequences use the Demographic Study Area to analyze the forecasted growth along the US 281 Project Corridor. To help ensure consistency with local and regional plans and policies, the demographic projections developed by the MPO for *Mobility 2035* were used. The MPO forecasts population and employment growth using geography called TAZs. 2005 was used as the base year and the data was sourced from the Census Bureau 2005 estimates. Forecasts were produced for 2008, 2015, 2025, and 2035. **Figure G-5** highlights the TAZs in the Demographic Study Area.

**Figure G-5: US 281 – TAZs in the Demographic Study Area**

## Socioeconomics

As part of **Chapter 3 – Affected Environment and Environmental Consequences**, socioeconomic characteristics are discussed which includes analysis of Environmental Justice (EJ), Limited English Proficiency (LEP) and other socioeconomic characteristics. Data from the 2010 Census, ACS 2008 to 2012 5-year survey, and the BLS were used to analyze the socioeconomic characteristics along the US 281 Project Corridor for this Final EIS.

**2010 Census** data include: block level data for total population, race and ethnicity.

**ACS 2008 to 2012 5-year survey** data include: block group level data for household income, poverty, employment and commute characteristics, and tract level data for ability to speak English, linguistically-isolated households and household occupancy

**BLS** was used for year-to-year employment/unemployment statistics at the county and Metropolitan Statistical Area (MSA) level.

The socioeconomic characteristics in this Final EIS are generally analyzed within the Demographic Study Area (with the exception of BLS Employment statistics, which are analyzed at the county level). As mentioned above, a redistricting effort took place between the 2000 and 2010 Census. **Table G-10** is a conversion chart between the 2010 and 2000 geographies at the census tract level within the Demographic Study Area.

**Table G-10: Change in 2010 and 2000 Census Tracts in the Demographic Study Area**

## Environmental Justice (EJ) Populations

For the analysis of EJ two study areas were developed, the Study Area for Race and Ethnicity and the Study Area for Income and Poverty. These two study areas are distinct because the most detailed information on these topics are available in different geographies and are sourced from different Census Bureau products. The Study Area for Race and Ethnicity includes all Census Blocks located within or immediately adjacent to the right-of-way (ROW) of the Build Alternatives and the Study Area for Income and Poverty includes all Census Block Groups located within or immediately adjacent to the ROW of the Build Alternatives. For this study, immediately adjacent means all geographies that intersect a 500-foot buffer around the centerline of the existing US 281 roadway. The study areas represent the area where direct effects would potentially be experienced as a result of the proposed US 281 project. **Figure G-6a through G-6c and Figure G-7** highlight these geographies.

## Minority Populations

A minority is defined as a person who is the following race or ethnicity:

- Black (having origins from any of the black racial group of Africa)
- Asian-American (having origins from of the original peoples of the Far East, Southeast Asia, the Indian Subcontinent, of the Pacific Islands)
- American Indian and Alaska Native (having origins from any of the original people of North America and who maintains cultural identification through tribal affiliation or community recognition)
- Hispanic or Latino (of Mexican, Puerto Rican, Cuban, Central or South American, or other Spanish culture or origin, regardless of race).

Several blocks in the Study Area for Race and Ethnicity contain a population of zero. **Table G-11** provides data for all blocks that contain a population. The following blocks have reported zero population in the 2010 Census.

- Block 2001, Block Group 2, Census Tract 1219.05, Bexar County, Texas
- Block 1006, Block Group 1, Census Tract 1211.18, Bexar County, Texas

### Low Income Populations

Low income is defined in US DOT Order 5610.2(a) as a person whose median household income is at or below the U.S. Department of Health and Human Services (USDHHS) poverty guidelines. The USDHHS poverty guidelines are categorized by the number of persons living in a household. The average household size in Bexar County was 2.75 people and in Comal County was 2.6 people in 2010 (U.S. Census Bureau 2010). The 2014 USDHHS poverty guideline for a 3-person household is \$19,790 (USDHHS 2014). This value was adjusted to 2012 dollars using the Consumer Price Index to ensure an equal comparison with Census data, which are reported in 2012 dollars (\$19,229). The closest income bracket reported by the US Census Bureau is \$19,999; this value was used to identify low-income households in the Study Area for Income and Poverty.

Table G-12: Median Household Income in the Study Area for Income and Poverty – ACS 2008-2012

**Persons with Limited English Proficiency (LEP)**

2010 Census geography was used for the analysis of LEP in the Demographic Study Area. LEP is defined as having “limited ability to read, write, speak, or understand English” (67 Federal Register (FR) 41459). For the purposes of this study LEP is defined in two ways:

- those that speak a language other than English and speak English “less than very well”
- linguistically-isolated households which refer to those households where all members, 14 years of age and older have at least some difficulty with English

## Demographic Analysis for Indirect Effects

**Chapter 4 – Indirect Effects** analyzes demographic trends and forecasts at a larger scale known as the Area of Influence (AOI). The AOI represents the geographic area where probable encroachment-alterations and induced land development effects of the US 281 Corridor Project are likely to occur and includes portions of Bexar, Blanco, Comal and Kendall counties. The US Census was used to analyze historical population growth trends and TSDC and ESRI data were used to analyze the forecasted growth around and within the AOI. A map of the AOI is shown in **Figure G-8**.

**Figure G-8: Area of Influence for Indirect Impacts Analysis**

Source: US 281 EIS Team, 2010.

**Table G-20: Population Growth within the AOI – County and Select Cities - 1970 to 2010 Census**

Geography	Population 1970	Population 1980	Population 1990	Population 2000	Population 2010
<b>County</b>					
Bexar	830,460	988,800	1,185,394	1,392,931	1,714,773
Blanco	3,567	4,681	5,972	8,418	10,497

## Demographic Analysis for Cumulative Effects

**Chapter 5 – Cumulative Effects** analyzes demographic trends and forecasts within a study area referred to as the Socioeconomic and Community Resource Study Area (RSA) (**Section 5.3.2 Socioeconomic and Community Resources**). This RSA represents the geographic area that could be affected by reasonably foreseeable future development. Population, minority, and age statistics from the 2010 Census and income from the 2006-2010 American Community Survey were used in **Chapter 5** and were analyzed at the Census Tract level. A map of the Socioeconomic and Community RSA and the corresponding 2010 Census Tracts is shown in **Figure G-9**. **Table G-23** provides population and minority population from the 2010 Census, **Table G-24** provides median household income data from the 2006-2010 American Community Survey and **Table G-25** analyzes the age group distribution within the RSA from the 2010 Census.

**Figure G-9: 2010 Census Tracts within the Socioeconomic and Community RSA**
